**BUSINESS TRANSFORMATION**

# AGILE IS OUR MANTRA

We follow Agile and Scrum methodologies throughout the software lifecycle, to ensure that even with requirement changes, you will be confident upon delivery.

# CUSTOM SOFTWARE DEVELOPMENT

From planning to deployment phase, all tasks and deliverables along with required sign-offs, are well-defined and documented, ensuring that your project will be delivered on time and on budget.

- Data Analytics
- Enterprise Process Automation
- Software, data & content cloud migration Software,
- Web & Mobile apps
- Workflow Management
- Natural Language Processing

**IN BLOCKCHAIN, WE COUPLE EMERGING TECHNOLOGIES ALONG WITH MODERN DESIGN PRINCIPLES, TO HELP BUSINESSES DIGITALLY TRANSFORM.**

 Our outsourcing services are based on technologies & platforms for backend, desktop, mobile, web services and database.

# BLOCKCHAIN APPLICATIONS

**WE USE BLOCKCHAIN TECHNOLOGIES TO HELP PEOPLE FORMULATE COMMUNITIES IN ORDER TO TACKLE DEMANDING PROBLEMS.**

**Collaboration around the globe:** Distributer Ledger Technology (DLT) solutions and the use of Smart Contracts help us create large communities where people can exchange data and money in a transparent and trustworthy way.

**Blockchain in media:** Our profound experience in content management, editorial systems and news verification tools, allows us to build DLT solutions which facilitate collaborative fact-checking and citizen journalism between freelancers and agencies.

**Revolutionized Marketplaces:** The power of blockchain will permit suppliers and buyers to interact on a platform with high levels of trust and transparency, setting their own rules, with no third-party restrictions.

A dedicated blockchain lab focuses on Smart Contracts and Blockchain solutions for business, government and enterprise.

# MEDICAL SOLUTIONS

**THANKS TO ITS TEAMS' EXTENSIVE EXPERTISE, BLOCKCHAIN CAN PROVIDE FIRST CLASS SERVICES CONCERNING INNOVATIVE SOLUTIONS ON DISEASE MANAGEMENT AND HEALTHY LIVING.**

- Wearable sensors and devices record real-time biological signals that are safely stored in the cloud.
- Health professionals access their patients' personal profile, laboratory tests or even their family medical history data via an online platform.
- Well informed decision making in case of patients with chronic illnesses or even use the recorded health indicators to identify and prevent the emergence of chronic diseases.

**An innovative, integrated system for telemonitoring biological signals and health parameters, which enables doctor-patient ubiquitous interaction.**

We can ensure detailed definition of overall architectures and specifications for the whole design activities and the components of a medical software platform, targeting the identification and engagement of different stakeholders.

# SCALABLE COSTS

MEASURABLE RETURNS

1

#### Fixed-price agreement

We just define requirements and timelines up front.

2

#### Time and materials contract

The best fit for long-term projects, with dynamically changing requirements and undefined scope of work.

3

#### OnSite or Offshore

With teams able to work either in our premises or in your offices, we can secure the best of both worlds!

4

#### Dedicate development center

Get full control over the operation and the deliverables of your dedicated team.

5

#### Build-Operate-Transfer

We set up and run an offsite development or support unit on your behalf for a predefined period of time. In due time, you take full ownership!

LET US DECIDE TOGETHER WHICH OUTSOURCING MODEL FITS YOU AND YOUR PROJECT BEST!

WE BALANCE EXPECTATIONS ON TIME, PRICE AND REQUIREMENTS TO SECURE TRUSTED PARTNERSHIPS!

# Blockachain

Blockachain is a full-service software development company, that exploits modern design principles, along with the latest blockchain, cloud, mobile and desktop technologies to deliver software of best-in-class performance at affordable prices.

Our engineers, designers and developers couple novel technology with deep industry expertise to help you meet your business ambitions.
